Weights sold separately

SLS500 Leverage Squat

Build mass and strength in the thighs, glutes, calves and lower back with Body-Solid's SLS500 Leverage Squat. Engineered to eliminate the risks of squats, the SLS500 Leverage Squat enhances the benefits, increases effectiveness and carries a full commercial rating, making it perfect for any facility.

A biomechanically correct angled squat platform ensures peak effectiveness and safety through the exercises. A rounded calf block also provides extra range of motion making the SLS500 Leverage Squat an ideal machine for those serious about squats.

Weight: 398 lbs.
